

Ribezzo PAINT CAN LINER

- A handy new paint accessory item, manufactured in Canada
- The Ribezzo paint can liner is designed to be used with standard 4L (1 gal) paint cans but is sturdy enough to be used on its own or even with some other paint containers
- Many painters like to paint directly from a paint can when doing their trim work; the paint can liner will save them clean-up time and save them having to purchase and store empty paint cans
- A wide lip covers the full rim of the paint can and is angled so paint will drip towards the inside of the liner when brushing off excess paint and not down the outside of the can
- The liner does not extend right down to the bottom of the paint can, so can be used with a small amount of paint remaining in the can too
- The liner stays in place during usage in a paint can but is easy to insert and remove
- Made from durable PET plastic, resistant to most solvents
- Available in a convenient shelf/counter top displayer carton to maximize impulse sales
- Another new innovation from T.S. Simms & Co. Limited
